

BRIGHT KURE & SEAL

A premium, 26% solids concrete cure and seal formulated from pure, non-yellowing acrylic to protect and enhance architectural and decorative concrete. Tested and approved by various Departments of Transportation (DOT), it exceeds expectations for concrete curing, dustproofing and maintenance. Available in gloss and matte finishes.

- PURE ACRYLIC FORMULA
- D.O.T. APPLICATIONS
- COLOR AND AESTHETIC ENHANCING

BENEFITS

PROTECT AND ENHANCE

Enhances and maintains the beauty and integrity of architectural and decorative concrete surfaces with a hard, durable film that provides increased abrasion, stain and weather resistance when compared to standard cure and seal products.

BRING OUT THE NATURAL BEAUTY

Highlights the natural colors and aesthetic of the substrate and imparts a rich "wet look" that will not yellow. Inhibits efflorescence, mildew and other unsightly surface defects. Available in choice of sheens, or tintable with color packs for a variety of color choices.

IDEAL USES AND APPLICATIONS

Bright Kure & Seal was formulated to protect architectural and decorative concrete such as exposed aggregate, colored, and stamped concrete. Use on decorative concrete floors and overlays, sidewalks and walkways, pavers, block, stone and slate.

TESTING DATA

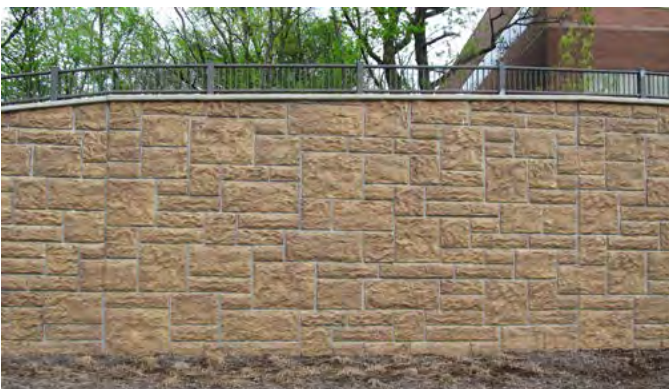

- ASTM C-1315, TYPE 1, CLASS A,B & C
