TK-TINT PASTE COLOR CHART

Item No: TK-1100 series

TK-TINT PASTE

TK's Tint Paste is the *ideal* color addition for *beautifying* and *protecting* concrete and masonry surfaces.

A color additive specifically designed for use with TK's line of versatile curing compounds*. When mixed properly with these compounds, TK-TINT PASTE produces an opaque, uniformly tinted cure and seal for a variety of applications.

Available in 24 standard colors, or custom colors may be produced upon request.

FEATURES AND BENEFITS:

- Hides shading variations due to placement, patching, concrete admixes, finishing procedures and weather conditions to produce a uniformly and evenly colored surface.
- Helps prevent pop-outs on patched surfaces.
- When mixed with curing compounds, TK-TINT PASTE becomes part of that compound and acquires its physical properties, including:
 - Promoting optimal curing for maximum hardness and end results.
 - Sealing the surface and providing protection against damage from deicing chemicals and water infiltration.

APPLICATIONS:

For interior or exterior use on horizontal concrete and masonry surfaces. Ideal for beautifying patios, walkways, and basement floors.

AVAILABILITY:

Packaged in 1-pint cans for use with TK's line of curing compounds*.

***Curing compounds sold separately**
