TK-DOT STAIN

Product Information Statement for LEED® New Construction (NC) Version 2.2 Credit Documentation

TK-DOT STAIN is a chlorinated rubber epoxy concrete curing and sealing treatment designed specially for vertical surfaces. It is pigmented to a concrete color gray to hide color imperfections in concrete. As with all coatings, TK-DOT STAIN is a maintenance product that may need to be recoated as it weathers and wears. TK-DOT is compatible with most curing compounds.

TK Products certifies the following information for TK-DOT STAIN:

Manufacturing Location

TK-DOT STAIN is manufactured in Minnetonka, MN.

Recycled Content

TK-DOT STAIN is manufactured with 6% of pre-consumer material recycled content from the normal recovery of raw material in the manufacturing process.

VOC Content

TK Products certifies that the VOC (volatile organic content) of TK-DOT STAIN is 702g/l.

Based upon the above information, TK Products certifies that TK-DOT STAIN may contribute to the following LEED NC v2.2 Credits:

- MR Credits 4.1 & 4.2: Recycled Content: 10% & 20% (post-consumer + ½ pre-consumer)
- MR Credits 5.1 & 5.2: Regional Materials: 10% & 20% Extracted, Processed, & Manufactured

Respectfully,

LEED Administrator
